This performance will create **a heart that will light up after sunset**, as unequivocal expression of the great love of the Venetians - residing or "del cuore" (*loving Venice*) - for this unique city . All participants will be dressed all in white, the color of purity and hope, to recall the great history of the Serenissima Republic in the field of human rights and justice. A choreography of lights will create a striking image never seen before in this square, that will go all around the world . The performance of human land art, conceived and coordinated by the **artist Elena Tagliapietra** , requires the active participation of the Venetians and will present plenty of surprises that will be revealed in the coming months .

The **writer Alberto Toso Fei** will tell ancient stories regarding the laws that Venice has issued in the course of its history: the abolition of the slave trade (the first state in the world to do it, in 960); the regulations on child labor, in force since the end of the fourteenth century to protect children and girls; the recognition of intellectual property, with the creation of the first "copyright " in history.

Alberto Toso Fei will present a flash reading during the event in the Piazza San Marco, and a more exhaustive one during the evening appointment's after the performance. In the evening will be celebrated the closing event of the two-year project that has presented the city of Venice with its ancient traditions and its precious places in a contemporary way thanks to innovative performance of body art painting , contemporary dance and interaction with technology that have never been realized before

From April 25th, 2015 **subscriptions are open to participate as a performer or assistant**: a unique opportunity to live in a new way the city of Venice and to send a message to the world : Venice is an extraordinarily vivacious and modern city, that from its ancient culture is able to look to the future with creativity .
